C++ Class 2023
Assignment #4:   Functions

Write 5 functions:

FindArea – takes 2 integers, calculates the area and returns it

FindVolume – takes 3 integers, calculates the volume and returns it

FindMaxInt – takes 3 integers, finds the maximim number and returns it

FindMinInt – takes 3 integers, finds the minimum number and returns it

FindPower – takes base and exponent values as integers, calculates result and returns it
        Please use FOR LOOP to find power

In Main, execute these calls:

```
    FindArea(3,4);

    FindVolume(3,4,5);

    FindMaxInt(2,3,4);
    FindMaxInt(10,6,9);
    FindMaxInt(-2,-1,-4);

    FindMinInt(7,2,4);
    FindMinInt(-1,0,1);
    FindMinInt(7,6,5);

    FindPower(2,3);
    FindPower(3,2);
    FindPower(4,0);
```

Finally,
    1) Output Area
    2) Output Volume
    3) Output sum of MaxInts
    4) Output sum of MinInts
    5) Output sum of Powers
