C++ Class 2023
Assignment #5: Classes

Write Class called "Time" which:
        Has a member function to set hour, minute and second
        Has a member function to print the time to the console

Then, in main():
        Instantiate 3 or 4 objects of our Time class
        Set the time for these objects
        Print the time for each object to the console.

Extra credit:
        Write a member function to add hour, minute and seconds after setting

Extra Extra credit
        Handle rollovers in the new add function i.e. > 59 seconds
